Aircraft Noise & Planning

Acoustic Associates can provide a service to assist Planners concerned with development and Airport Authorities concerned with noise control:

+ Conduct long term noise monitoring.

+ Produce Noise Contours using predictive computer software.

+ Make environmental impact assessments in support of planning applications for airfield development, or for residential development in the vicinity of an airfield.

+ Provide a complete service for the design, including engineering design, of noise suppressed engine ground testing facilities e.g. engine test cells, run-up enclosures (hush houses), run-up pens.
