# Acoustic Associates

## Acoustic Services

### Room/Building Acoustics

- Auditoriums, Concert Halls and Cinemas
- Sound Insulation Testing/ADE/PCT
- Sound System Design
- Acoustic Modelling/CATT Acoustics

### Legal/Planning/Assessment

- Aircraft Engine Test Cells
- Aircraft Noise
- Road Noise
- Rail Noise
- Industrial/Workplace
- Planning & Assessment
- IMMI Noise Mapping & Prediction
- Expert Witness/Court Appeals/Legal

### Vibration

- Environmental Vibration
- Human Vibration

### bb93 - Design for Schools

- School Acoustics

## Energy Services

- Air Tightness Testing
- Display Energy Certificates
- Domestic Energy Performance Certificates
- Non-Domestic Energy Performance Certificates
- SAP Calculations

## Auditorium Acoustics

Acoustic Associates design auditoria and performance spaces for exceptional acoustic performance.

Creating an optimum acoustic is a subtle blend of many factors. At Acoustic Associates we understand that many of our clients are trying to juggle many financial, structural, and other design issues. We therefore pride ourselves in offering practical advice whatever your budget.

We currently use the latest acoustic modelling software, research, and design techniques to inform our design process and are happy to liaise with architects and other members of the design team as required.

Our previous projects have included concert halls, churches, drama theatres, music rooms, and multi purpose performance spaces.

Whether you are trying to improve the acoustics of an existing space or designing from scratch, our team of expert consultants are on hand to help.
